POINTS FROM FOREIGN SOURCES. When the Spanish Minister, who received me with unruffled complacency, though I had announced in my report on Cuba the hopelessness of the Spanish cause there and the manifest destiny and great desira-bility of annexation—and he stated that he had read my "elevated effort"—and he was pleased to compliment it as a literary work; I asked him to point out the deficiencies, and his first remark was that he "recognized the sincerities that were in it." He served, however, that he was easily able to find the origin of the statements that in it were accepted as information; they were manifestly from foreign sources. His diplomatic career of twenty-eight years had made him an expert in detecting foreignisms. He was something of a foreigner himself, having been so long in diplomatic capacities away from his own country.

I asked about the taxation of sugar, as I had been charged with accepting wildly erroneous figures, and the reply was, my misinformation on that subject was extensive, as, for instance, the export duty on sugar, instead of being three cents a pound, was 75 cents a ton-certainly a very extravagant discrepancy-and the Minister knew of an American sugar plantation in Cuba on which the Government tax was less than \$2,000 a year, and the proprietor had to pay the insurgents over \$20,000 to save the property. The rebels had increased the internal revenue tax on sugar ten times!

Concerning the tobacco, that interest had been used in behalf of the insurrection, and if the export duty was prohibitory, as of course it was not, the hordes of persons professing to serve the independence of Cuba at Key West and Tampa would be driven to go home to make their living. 50,000 volunteers, and they will, as busiIndeed, I fear the Spanish Minister may be ness men, fight against the annihilation of the object moved. The whole of the revenue of Cuba, the Spanish Minister said, was about \$26,000,000 annually, and of that two-thirds was from customs, and this showed the falsity of the ciaim of the insurgent leaders that they were burning sugar for the purpose of depleting the revenue of Spain. If there was no revenue derived from Cuban sugar it would be no great matter to Spain. The motives of the insurgents in cane burning were, of course, those of terrorism. The motives of the plantations for the raising of money to promote disorder was enforced by the menace of incendiarism, and there who were the pure whites and the question who were the pure whites and the question who were the pure whites and the pure blacks and the mixed races was one of different consulting and delicacy in the West Indies.
